

Code	Type	Material	I.D.(Tol.)	O.D.(Tol.)
OFK03	Straight	High Tensile Brass Alloy(SP2) Solid Lubricant Embedded (Graphite)	G6	m6
OFK04				h6
OFL03				m6

Features

- Self-lubricating, maintenance-free, with a stable low friction coefficient under heavy load and low-speed movement.
- Excellent wear-resistance, applicable for linear and rotary movement.
- High and low temperature resistance, strong impact resistance.

The shaft diameter tolerances that match this product: d8 heavy load, e7 light load, g6 high precision(for reference only).

When the product is pressed into the seat hole, put on a little lubricating oil on the end or inner wall of the seat hole, and use a hydraulic press or vise to slowly press it into the seat hole. Do not hit the product hard to avoid deformation of the product.
