Left use example

Right use example

- When closing the door, operate while pulling the center rivet (※ in up figure) toward you.
- When installing this stay to sheet metal, be sure to perform thread relief processing (chamfering) on the mounting surface side (cabinet side). In this way, screw head will not protrude when the stay is fixed.

Left use example

Right use example

- Catch mechanism may not work, depending on door weight.
- When installing this stay to sheet metal, be sure to perform thread relief processing (chamfering) on the mounting surface side (cabinet side). In this way, screw head will not protrude when the stay is fixed.

The latches click when open at 160° before being fixed by the catch mechanism.;
The catch mechanism can be released when firmly pushed at the ends of the latches (e.g. with hands).
