- ① No Electroless Nickel Plating and Black Oxide at ends and grooves of posts.
- ② The raw material of Hollow Posts is seamless tube, with internal I.D tolerance $\pm 2\text{mm}$.
- ③ If there is requirement of rust prevention, please choose stainless steel materials or electroless nickel-plated products firstly.
- ④ Due to the different production batches of post products, nickel plated products may have fine sand blasting, which does not affect the size and function.
