

Leveling Mounts

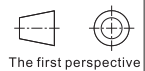

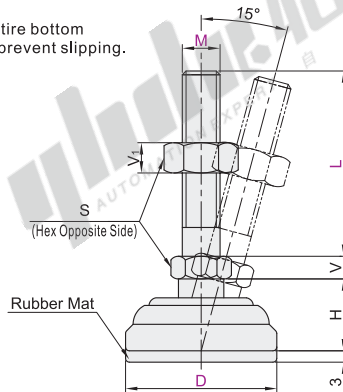

- Swivel, Reinforced Polyacetal Base
- Swivel, Metal Base
- Medium-Light Load

Reinforced Polyacetal Base

Code	Type	Material	Surface Treatment
WAG51	Reinforced Polyacetal Base	S45C	Zinc-plated
WAG56	with Rubber Mat	SUS304	—

Features

- Rubber-type Base can make the entire bottom surface contact with the ground to prevent slipping.
- It can be tilted in 360° direction.

Metal Base

Code	Type	Material	Surface Treatment
WAG41	Swivel	SUS304	—
WAG46		S45C	Zinc-plated

- ① Since the steel on the market has a gradient of 5mm and there are tolerances, the tolerance of the machined base -2~0mm is a reasonable range.
- ② The load of the universal leveling mount is vertical static load value. When calculating the load value, the safety factor needs to be adjusted according to the actual scenario.
